Problems in Real Time**

# Our Working Methodology

# Engagement Models

## Fixed Price Model

This model suits clients with well-defined requirements and plans for outsourcing work. We analyze the scope of accounting and finance work and charge a fixed fee, thus reducing the risk of extra costs.

## Dedicated Resource (FTE) Model

This model suits clients with when there is ongoing tasks whole around the year and there is no specific task to be executed It gives freedom to add additional resources to meet project deadlines and demands & Ideal for businesses with medium to high volume workloads seeking a reliable outsourcing solution.

## Transaction-Based Pricing Model

This model is based on the volume of work, where the client is charged on the number of transactions. We advise clients to opt for this model when the volume of work fluctuates drastically and is inconsistent. This model offers flexibility in pricing structure and higher visibility in staffing requirements and pricing.

## Hourly Model

This model suits clients with a limited approach to work plans and well-defined requirements for outsourcing work. We generally fix the resource who works; the rate depends on their experience and qualification.
